EDUCATION

Stanford University

Stanford, CA

Bachelor of Science in Computer Science, GPA: 4.05/4.0

Expected June 2028

Relevant Coursework: Operating System Principles, Computer Organization and Systems, Programming Abstractions, Mathematical Foundations of Computing, Introduction to Probability Theory, Linear Algebra and Multivariable Calculus, Frontier Systems

WORK EXPERIENCE

Stripe

Seattle, WA

Incoming Software Engineer Intern

Jun. 2026 – Sep. 2026

Stanford Carta

Stanford, CA

Backend Software Engineer

Jan. 2026 – Present

- Migrated the legacy **.NET 6** backend for Stanford's course planning platform to **.NET 8 LTS**, resolving **7 CVEs** and improving request performance by **15%**
- Reduced course planning site's **front-end CI/CD pipeline latency** by **44%** by switching from legacy create-react-app builds to **Rsbuild (Rspack)**

LastingLearn, Inc.

Stanford, CA

Software Engineer Intern

Oct. 2025 – Jan. 2026

- Architected an **AI-native** SAT prep platform using **React** and **Express.js**, integrating LLMs to generate personalized practice problems based on student performance history.
- Engineered a high-performance leaderboard using **Redis** Sorted Sets, reducing query latency by **90%** compared to standard SQL aggregations and handling **500+** concurrent updates.

Baker Engineering and Risk Consultants, Inc.

Houston, TX

Software Engineer Intern

Jun. 2024 – Aug. 2024

- Developed event tree analysis software in **C#/.NET WPF** with dynamic tree editing, reducing analysis time by **80%**

PROJECTS

Vista | Go, Bubble Tea

- Built a **Bubble Tea**-based TUI in **Go** to monitor multiple services simultaneously with per-service and **interleaved log buffers**

CiteSite | Python, FastAPI, LangGraph

- Won **\$500** at YHack 2026, Yale University's annual hackathon
- Integrated academic research databases to verify the relevance of cited sources within academic research papers to stated claims

BobaFinder | Python, LangGraph, LangChain, MongoDB Atlas

- Built **multi-agent** market entry research system determining the best location for a boba chain restaurant
- Used **LangGraph Swarm** to enable multi-agent collaboration

Decanter | JavaScript, React, Typescript, Next.js, Node.js, Supabase, PostgreSQL

- Built volunteer management platform for Science Olympiad tournaments using **Next.js** and **Supabase**, implementing Google **OAuth** authentication, attracting **75+** users in the first month
- Used **Vitest** to automate unit testing on server functions with **97%** code coverage, enhancing codebase resiliency

TECHNICAL SKILLS

Languages: C, C#, C++, CSS, Go, HTML, Java, JavaScript/TypeScript, Python

Tools: Azure DevOps, Git, Linux, VS Code, Visual Studio

Frameworks: Bubble Tea, Express.js, React, .NET, Next.js, Node.js

Databases: SQL, MongoDB, PostgreSQL

HONORS

3x American Invitational Mathematics Examination (AIME) qualifier
